

SUPERTOMMY:

Oceanic Champion!

By CHLOE WISNIEWSKI

Tommy the pufferfish rests in his tank...

When suddenly...

Somebody needs my help!

Hello?

SUPERTOMMY!
My cave is too warm and I can't sleep! Could you help me?

Sure, I'll be right there!

SUPERTOMMY's human housemate helps load ice cubes onto the NAUTICAL NOTION.

... and with that task completed, SUPERTOMMY flies off to help the creature in need!

SUPERTOMMY brings the ice cubes into the eel's home.

Thanks, SUPERTOMMY!

Afterwards, SUPERTOMMY returns home to get some rest...

RING!

Another call?!

RING!

Humans have drastically sped up Earth's warming through the emission of "greenhouse gasses" such as carbon dioxide and methane!

These gasses are produced by human activities like factory production and transportation through automobiles.

Marine organisms, who cannot quickly adapt to climate change, are affected by your actions greatly!

Marine organisms, such as plankton, are decreasing in number due to the sudden change in temperature. This will devastate the food chain.

This issue and many more will cause species to move away from their homes in search for a better habitat, leaving the ocean in utter imbalance.

The effects of climate change on the ocean have already taken hold in some respects. For example, half the corals in the Great Barrier Reef have died since 1995!

However, our marine friends are not the only creatures in danger! Even if we disregard the impact the disarray within the **ocean** will have on the land, there are still many issues that will prevail on the latter due to climate change!

if humans cannot soon limit the average global temperature to 1.5 degrees Celsius above pre-industrial levels...

Middle Eastern countries will undergo heatwaves which may turn fertile land into desert...

and increased rainfall will put Europe in danger of **flooding!**

Countless other issues will occur as well, causing a global crisis for a multitude of plants and animals, including humans!

An underwater scene featuring a pink squid, a blue whale, a grey mouse, and a large yellow fish wearing a red and white life preserver. Bubbles are scattered around them.

Help battle climate change by taking steps to reduce it and encouraging your friends to do the same!

A central illustration divided into three sections. On the left, a car with three people inside and a license plate that says 'CARPOOL'. In the middle, a blue recycling bin with a white recycling symbol and a plastic bottle being thrown into it. On the right, a baker in a white uniform and hat handing a cupcake to a customer who is paying with a green bill. A sign above the counter says 'Nadia's Bakery'.

Carpooling, **recycling**, and supporting eco-friendly businesses are all great ways to take part in the fight against global warming!

A purple postman character with a yellow face and a red hat is shown from the side, holding a white envelope. To the right is a grey mailbox with a red flag. The background shows green grass and trees.

Don't forget to write letters to governments and businesses! Many organizations are already enforcing policies to support the battle against climate change, but there is no harm in further encouraging this behavior!

A cartoon illustration set against a dark blue space background with small white stars. On the left, a large, smiling Earth with a blue face and green continents is shown. On the right, a yellow, round superhero character with a red cape and a red bow tie is depicted in a dynamic, shouting pose. A large white speech bubble originates from the superhero, containing the text: "Let's all do our part to reduce climate change so we can continue living on a happy and healthy planet!".

Let's all do our part to
reduce climate change so
we can continue living on
a happy and healthy
planet!

MAZE:
 Help SUPERTOMMY through this maze to help a creature affected by climate change!

Show your support for the battle against climate change by taking the SUPERTOMMY Ocean Advocate pledge at <https://www.change.org/SUPERTOMMY>

A SUPERTOMMY Adventure!

Join SUPERTOMMY as he
faces an invisible yet
distinctly destructive foe-
CLIMATE CHANGE!

Will he be able to fight off
such a menace by himself?

See for yourself in this
SUPERTOMMY comic!
